INSTALLATION INSTRUCTIONS

Product code: 1947.BAL.G | i.Care Shower Chair with Backrest & Arms (Grey)

BALMORALS
London

IMPORTANT INSTALLATION NOTICE

Installation must be carried out by a qualified tradesperson using suitable, non-rusting fixings appropriate for the wall substrate. Fixings are not included so that the correct fixing method can be selected for the specific installation. If uncertain, consult the fixing manufacturer.

MAXIMUM USER WEIGHT: 190 kg

Rating applies when the chair is correctly installed on a suitable wall using appropriate fixings.

Intended Use

Provides stable seated support in the shower for users who are unable to stand for extended periods. The seat can be folded up against the wall when not in use.

Installation Recommendations

Ensure the installation area is waterproofed.

Use non-rusting fixings and seal wall contact points to help prevent water ingress.

Maintenance & Safety

Inspect regularly for wear, looseness or damage.

Do not use the chair if it is unstable or if the rubber feet/ferrules are damaged.

INSTALLATION PROCEDURE

1. Determine position and height
Identify the correct installation position and seat height within the shower area.

2. Check before drilling
Before drilling, confirm that there are no concealed electrical cables or pipework behind the wall.

3. Adjust leg height
Use the E-clips and leg adjustment holes to set the extension tubes to the required height. Fine adjustment can be made using the threaded feet; tighten the locking nuts after adjustment.

4. Mark fixing points
With the seat fully down (90 degrees to the wall), legs vertical and both feet flat on the shower base, mark the wall-mounting bracket fixing positions.

5. Secure the mounting bracket
Fix the wall-mounting bracket using suitable non-rusting screws and fixings appropriate to the wall construction.

6. Check operation
Raise and lower the seat to confirm smooth operation. Confirm that the legs remain vertical and the feet stay securely in contact with the shower base when the seat is down.

7. Final inspection
Confirm that the chair is firm, stable and securely installed before use.

Maintenance Guidelines

- Regularly check that the chair remains stable and secure.
- Confirm all fixings are tight and in good condition.
- Check rubber feet/ferrules monthly for wear or damage.

Cleaning Instructions

- Clean the frame, seat, backrest and arms using a non-abrasive cream cleaner or mild detergent solution.
- Avoid harsh chemicals or abrasive materials to preserve the finish.
